## Our Mission

Since 2017 Save the Shark is a non-profit organization dedicated to the preservation of the sea and marine fauna. Our mission is to conserve marine ecosystems and protect sharks, crucial creatures for the balance of the oceans.

We conduct in-depth research on shark life and marine ecosystems. We implement educational programs to raise public awareness about the importance of protecting the oceans. We collaborate with scientific institutions, governments, and other organizations to develop effective conservation policies.

## Our Goals

Our main goal is to ensure the long-term survival of sharks and the health of the oceans. We aim to reduce marine pollution, preserve critical marine habitats, and promote sustainable fishing practices.

## Why Shark?

Sharks are essential for maintaining balance in marine ecosystems. As top predators, they regulate the population of other marine species, contributing to biodiversity. Their preservation is crucial for the overall well-being of the oceans. If you want to learn more about them, visit our **discover** section

1/3

open-ocean shark species are currently categorized as threatened with extinction

100

million sharks are killed annually in commercial fisheries

90%

of shark populations have declined in certain regions

## Our Progress

- 2017-2018: Laid the foundation, clarified the mission, and initiated early community building efforts.
- 2019: Overcame funding challenges, successfully launched an impactful educational program with a local school
- 2021-2022: Launched a successful grassroots online campaign, doubling our community size. Celebrated a significant breakthrough in research findings, leading to the inception of "Project Deep Insight," focused on understanding and preserving deep-sea ecosystems.
- 2023: Resumed and expanded volunteer programs, with a spotlight on "Project Ripple Effect," a coastal cleanup initiative. Ongoing projects, including "Deep Insight," continue to make strides despite challenges, building a resilient foundation for the future.
